Professional Summary

Senior Frontend Engineer with 5+ years of experience owning and shipping production mobile and web applications. Specialized in React Native, Expo, React, Next.js, and TypeScript. Proven success leading mobile rebuilds, release pipelines, in-app purchases, QA automation, SDK migrations, and cross-functional feature delivery across iOS and Android. Experienced in building scalable frontend systems, release engineering workflows, and AI-assisted developer tooling.

Core Skills

React Native, Expo, React, Next.js, TypeScript, JavaScript, Zustand, Playwright, Selenium, CI/CD, EAS, Firebase, GitHub Actions, React Query, REST APIs, Mobile Release Engineering, App Store Connect, Google Play Console, Bit, Google Cloud, Figma-Based Development

Professional Experience

Senior Frontend Engineer | Camp Gladiator | 2022–Present

- Primary owner of React Native and Next.js applications spanning architecture, feature delivery, QA, deployments, and production support.
- Led full mobile rebuild using Expo with reusable component systems and scalable frontend architecture patterns.
- Delivered complex mobile features including onboarding, subscriptions, in-app purchases, maps, scheduling, analytics, and nutrition systems across iOS and Android.
- Designed scalable state management and frontend architecture patterns using Zustand, reusable hooks, and modular component systems.
- Managed iOS and Android release pipelines including EAS builds, TestFlight, Google Play testing, store submissions, phased rollouts, and production hotfixes.
- Resolved complex native dependency, Expo SDK, and React Native upgrade issues across iOS and Android build systems.
- Introduced Playwright automation and strengthened release quality across platforms.
- Built internal AI-assisted engineering workflows for PR review automation, release note generation, and development productivity tooling.
- Built and maintained reusable shared component systems to improve development velocity and consistency.

QA Engineer | Camp Gladiator | 2018–2022

- Built Selenium/Python automation and integration test coverage for customer-facing applications.
- Partnered with engineering teams to reduce regressions and improve release confidence.
- Performed exploratory and integration testing across mobile and web experiences.

IT Support Specialist | Camp Gladiator | 2015–2018

- Supported IT operations, systems troubleshooting, and hardware/software setup.
- Assisted with environment configuration and technical support across internal teams.

Education

Austin Coding Academy – Full-Stack Coding Certificate

University of Phoenix – IT Software Engineering Coursework
